

CertusDoc Forensic Report

Multi-Agent Document Forgery Detection System

Document Summary

Filename: tmp4fte6760.jpg
File Size: 215.3 KB
Pages: 1
Format: JPG
Processing Time: 3914 ms
OCR Confidence: 92.1%

Document Integrity Score

0.60

MEDIUM RISK

Forgery type: Jpeg Recompression

Agent Analysis Breakdown

Visual Tamper Agent

Score: 0.45 | Reliability: 1.00 | Time: 1899ms

!!! ELA block variance: CV=2.75, 3 outlier blocks of 77. Localized ELA anomaly suggests region-level tampering.
! Largest ELA anomaly region at (64,64) size 2352x3376
!! Strong double compression signal: JPEG block boundary ratios H=2.55, V=0.31 (expected ~1.0)
! Minor noise inconsistency: 71/2052 blocks anomalous (3.5%)

Metadata & Provenance Agent

Score: 0.82 | Reliability: 0.40 | Time: 0ms

! Metadata completeness: 0/5 expected fields present (0%). Low metadata completeness is suspicious.

Text Forensics Agent

Score: 0.93 | Reliability: 1.00 | Time: 7ms

! OCR confidence anomaly: 1 words with significantly lower confidence (mean: 92.1, anomalous words: CS-2ZUZ6-UU1). Found 1 spatial cluster(s).

CERTIFICATE OF COMPLETION

This is to certify that

John Doe

has successfully completed the requirements
for the Certificate Program in Computer Science

John Doe
Certificate No: CS-2026-999
Certificate No: CS-2026-001

Recommended Action

Document shows signs of jpeg_recompression. 1/3 agents converged. Recommend manual verification before accepting. Cross-check with issuing authority if possible.
